- Integrated advanced features such as feedback and rating system, worked hours tracking, and push notifications.
- Gained hands-on experience in mobile app development, Firebase Authentication & Firestore, and state management with GetX.

PROJECTS

Nursing Care Management System

Jan 2024 - Mar 2024

A web-based application for managing nursing services. It includes modules for admin, nurses, and users to handle service requests, job assignments, feedback, patient details, and payments. The system streamlines the workflow by enabling admins to manage users, nurses, and service categories, while nurses can view assigned jobs and user details. Users can request services, track service status, and make payments online.
